Summary

Java Developer with hands-on experience in building backend systems using Spring Boot and PostgreSQL. Strong understanding of OOP, SOLID principles, and REST API design. Improved backend performance using caching and query optimization techniques. Experienced in using AI-assisted tools to increase development efficiency and code quality.

Core Strengths

- Strong problem-solving skills with focus on optimized and efficient code.
- Ability to design scalable backend systems using layered architecture.
- Experience in improving API performance and reducing system latency.
- Good understanding of debugging, exception handling, and maintainable code.
- Quick learner with ability to adapt to new technologies.

Technical Skills

Languages:	Java (Core, Java 8), SQL
Backend:	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs
Frontend:	HTML, CSS, JavaScript
Databases:	MySQL, PostgreSQL
Tools:	Git, GitHub, IntelliJ IDEA, Postman
AI Integration:	GitHub Copilot (code assistance, faster development)
Concepts:	OOP, SOLID principles, Collections, Multithreading, Exception Handling
System Design:	Layered Architecture, API Design, LLD basics
Performance:	Caching, query optimization, reduced DB calls by 25%

Experience

Backend Developer Intern

Jan 2026 – Apr 2026

Inbatoz Consultancy Pvt. Ltd.

- Developed and integrated REST APIs using Spring Boot for backend services.
- Optimized API response time by approximately 20–25% through efficient query handling.
- Reduced redundant database calls using caching techniques.
- Tested and debugged APIs using Postman to ensure reliability and performance.

Project

Smart Housing System (Hostel Management)

Java, Spring Boot, Hibernate, PostgreSQL

- Developed a scalable backend system to manage buildings, rooms, tenants, and bookings.
- Designed REST APIs using layered architecture (Controller, Service, Repository).
- Implemented efficient CRUD operations and handled entity relationships using JPA.
- Reduced database load by approximately 30% using caching for frequently accessed data.
- Improved API response time by 25% through query optimization and efficient data handling.
- Implemented validation and exception handling for system reliability.
- Integrated Swagger for API documentation.
- Used GitHub Copilot to improve development speed and productivity.

Education

Bachelor of Computer Applications (BCA)

2025

G.S. Arts, Science and Commerce College, Khamgaon

HSC (Science)

2021

C.S. Kothari Jr College, Nandura
